Zomato UX Case Study Report

Author: Monika Choudhary
Product: Zomato Mobile App

Zomato is one of India’s most widely used food delivery and restaurant discovery platforms. This case study evaluates the end-to-end user experience, identifies strengths and weaknesses, and proposes UX improvements supported by conceptual mockups.

User Persona & Journey

Persona

Aarav, 23, college student in a metro city. Goals: quick, affordable food ordering. Frustrations: decision overload, hidden costs.

User Journey

- Home Screen → Browse restaurants
- Search & Filters → Select restaurant
- Menu browsing → Add to cart
- Checkout → Payment
- Order tracking → Feedback

Strengths & Weaknesses

Strengths

- Clear navigation
- Strong discovery features
- Real-time order tracking
- Personalized recommendations

Weaknesses

- Decision fatigue
- Hidden charges late in checkout
- Overloaded menus
- Offer confusion

Proposed UX Improvements

- Smart Decision Assistant – helps users choose quickly based on mood, budget, and time.
- Transparent Pricing Preview – shows estimated final cost early.
- Guided Menus with Visual Tags – highlights most ordered, healthy, and value items.

Improved UI Concept Mockups

Zomato UX Case Study

Live Order Tracking	Lack of Personalization

SUGGESTED IMPROVEMENTS

1. Enhanced Filters

Improved filter options.

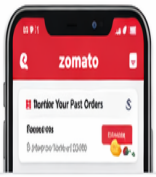

Advanced Filters UI

2. Quick Reorder

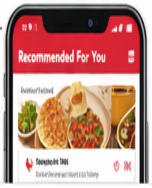

Easy access to past orders.

Quick Reorder UI

3. Personalized Recommendations

Suggested restaurants for you.

CONCLUSION & IMPACT

By making these improvements, we can enhance user satisfaction and increase repeat orders on Zomato.

Conclusion & Impact

By introducing guided decision tools, transparent pricing, and structured menus, Zomato can significantly reduce user frustration, improve trust, and increase repeat usage. These improvements aim to transform Zomato from a functional platform into a more supportive and delightful user experience.
